Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Prosise et al. (2004/0086468).

The claims are drawn to an anhydrous liquid tooth whitening composition.

Prosise et al. teaches a Tooth Whitening Delivery System comprised of PVP-hydrogen peroxide complex, glycerol, hydroxypropylmethylcellulose, ethylcellulose and ethanol (paragraphs [0015], [0017]). Prosise et al. also teaches that ethanol solvent

evaporates and once dried, a film of the composition adheres to the teeth for about 1 hour to bleach them, paragraph [0017].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prosise et al. (2004/0086468) in view of Diasti et al. (U.S. Patent 6,517,350).

The claims are to a kit comprising an anhydrous tooth whitening composition, a container for housing the composition and an applicator and a method of whitening teeth.

Prosise et al. is discussed above.

Prosise et al. does not teach a kit comprising the composition, a container and an applicator.

Diasti et al. teaches a tooth whitening compound with a carrier selected for adhering to a patient's teeth; and that the whitening compound is applied to the teeth by methods including painting or coating (Abstract). Diasti et al. teaches that the invention provides a whitening system and method which reduces or eliminates the annoyance of wearing pre-made trays or adhesive-type products (column 3, lines 32-36).
